DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless —

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 29-37 are rejected under 35 U.S.C. 102(b) as being anticipated by Simon (US Patent No. 3,537,834).

Simon discloses a glass sheet made by the overflow downdraw method. See col. 4, lines 64-70.

The reference fails to disclose the composition of the isopipe. However, the composition of the isopipe is imbedded in a claim limitation that is directed to how the glass sheet was formed. In other words, claims 29-37 are product-by-process claims. For purposes of examination, product-by-process claims are not limited to the manipulation of the recited steps, only the structure implied by the steps. See MPEP 2113. In the present case, the recited steps imply a structure of a glass sheet. The reference suggests such a product.

Allowable Subject Matter

Claims 1-28 are allowed. The prior art fails to disclose or suggest the recited zircon refractory composition.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Sample whose telephone number is (571)272-1376. The examiner can normally be reached on Monday to Thursday and alternate Fridays.
